December 2021

Dear Parent/Carer,

Protecting Your Children Against Meningitis and Diphtheria, Tetanus and Polio and Human Papilloma Virus

Your child is being offered catch up vaccinations in Year 10 and Year 11 for the following Immunisations

- **Human Papilloma Virus** – First offered in Year 8
- **Meningitis ACWY** – First offered in Year 9
- **Diphtheria Tetanus and Polio** – First offered in Year 9

How do I give my consent?

1. Go to www.hdf.t.nhs.uk/schoolvaccinations
2. Enter the School Code and click “**Find School**” (school code can be found at the end of this letter)
3. **Complete the form** with your child’s information and parent/guardian contact information*.
4. Click the **green “Submit” button**.

*Once submitted, if you provide a valid email address, you will receive an automatic confirmation email. We will also email you to let you know that your child has been immunised. If your child has specific medical requirements, one of our nurses may need to get in touch before we are due to carry out the immunisations. We routinely share your child’s vaccination information with their registered GP surgery.

HarrogateDistrictNHS

www.hdf.t.nhs.uk

The deadline for online consents is **Midnight Sunday 2nd January 2022**

Why is the Meningitis vaccine being offered?

The **MenACWY vaccination** helps to protect your child against four types of meningococcal bacteria (groups A, C, W and Y) that can cause meningitis (inflammation of the lining of the brain) and septicaemia (blood poisoning). These diseases are very serious.

Why is the Diphtheria, Tetanus and Polio vaccine being offered?

The **3-in-1 DTP booster vaccine** helps protect your child against three severe diseases; **diphtheria**, **tetanus** and **polio**.

Diphtheria is a serious disease that can damage the heart and nervous system.

Tetanus is a painful disease affecting the nervous system which can lead to muscle spasms and breathing problems.

Polio is a virus that attacks the nervous system which can cause permanent paralysis of muscles.

Is the HPV vaccine just for girls?

Historically this vaccine has only been offered to girls as HPV is the main cause of **cervical cancer**. However, due to increasing rates of **head and neck cancers** in adulthood linked to HPV infection, the programme is **now being offered to boys born on or after the 1st September 2006**. Early vaccination gives us the opportunity to help prevent the spread of a very serious disease that affects over 3,000 adults every year in the UK and causes over 1,000 deaths.

Where can I find out more?

We hope that the information provided addresses any concerns you or your child might have about these vaccinations. By having these vaccines your child will be protecting themselves and others from very serious diseases. It is important that this letter is shared with your child.

For more information regarding the **MenACWY** vaccination please visit this website:
www.nhs.uk/conditions/vaccinations/men-acwy-vaccine

For more information regarding the **DTP booster** vaccination please visit this website:
www.nhs.uk/conditions/vaccinations/3-in-1-teenage-booster

For more information about **our service** please visit:
www.hdft.nhs.uk/services/childrens-services/imms-cdurham-darlington-teesside/

For more information about **HPV** and why this vaccine is being offered:
www.nhs.uk/conditions/vaccinations/hpv-human-papillomavirus-vaccine

You can read the patient information leaflet for the **HPV** vaccine (Gardasil) here:
www.medicines.org.uk/emc/files/pil.261.pdf

We hope that the information provided addresses any concerns you or your child might have about the vaccination. By having the HPV vaccine, they will be helping to protect themselves and others from very serious diseases later in life. It is important that this letter is shared with your child.

If you have any questions regarding this programme, or you believe your child's vaccination status is not up to date **please contact the Childhood Immunisation Team** by emailing:
hdfc.immunisationteam@nhs.net

Yours sincerely,
